Journal of Biomedical Materials Research

Volume Contents – 1984

Issue 1, January 1984

A note from the Editor
A. N. Cranin v

Crosslinked agarose encapsulated sorbents resistant to steam sterilization. Preparation and mechanical properties
H. W. M. de Koning, R. A. F. M. Chamuleau, and A. Bantjes 1

Creep of conventional and microfilled dental composites
Y. Papadogianis, D. B. Boyer, and R. S. Lakes 15

Long-term compressive creep deformation and damage in acrylic bone cements
D. J. Chwirut 25

Compressive strength of implanted porous replamineform hydroxyapatite
J. F. Piecuch, A. J. Goldberg, C. V. Shastry, and R. B. Chrzanowski 39

Histological evaluation of porous titanium cardiac pacemaker electrode tips
M. S. Hirshorn, L. K. Holley, D. K. Money, M. Spector, F. A. Young, J. R. S. Hales 47

The glutaraldehyde-stabilized porcine aortic valve xenograft. I. Tensile viscoelastic properties of the fresh leaflet material
J. M. Lee, D. W. Courtman, and D. R. Boughner 61

The glutaraldehyde-stabilized porcine aortic valve xenograft. II. Effect of fixation with or without pressure on the tensile viscoelastic properties of the leaflet material
J. M. Lee, D. R. Boughner, and D. W. Courtman 79

Isolation of serum protein organometallic corrosion products from 316LSS and HS-21 *in vitro* and *in vivo*
J. L. Woodman, J. Black, and S. A. Jiminez 99

Preparation and strength of poly(ethylene terephthalate) fiber bundles for model synthetic tendons
J. Kolařík, J. Vaníček, and C. Migliaresi 115

LETTERS TO THE EDITOR

Comment on the characterization of porosity in PTFE-carbon composite implant materials by mercury porosimetry
J. M. Prewitt, III 123

Author's reply to Prewitt's letter
R. E. Dehl 124

Announcements 127

Issue 2, February 1984

Supermolecular organization of some polyurethanes containing sugar derivatives in the main chain
T. E. Lipatova, G. A. Pkhakadze, A. I. Snegirev, V. V. Vorona, and V. V. Shilov 129
Water sorption and mechanical properties of 2-hydroxyethyl-methacrylate and methyl-methacrylate copolymers
C. Migliaresi, L. Nicodemo, L. Nicolais, P. Passerini, M. Stol, J. Hrouz, and P. Cefelin 137
The interface of permucosal dense apatite ceramic implants in humans
H. W. Denissen, A. A. H. Veldhuis, H. W. B. Jansen, and A. van den Hooff 147
Age hardening of orthodontic beta titanium alloys
A. Jon Goldberg and C. W. Shastry 155
The effect of surface charge on arterial thrombosis
M. N. Helmus, D. F. Gibbons, and R. D. Jones 165
Enzyme histochemistry of the tissue response to pure metal implants
A. McNamara and D. F. Williams 185
On the true wear rate of ultrahigh molecular weight polyethylene in the total knee prosthesis
R. M. Rose, M. D. Ries, I. L. Paul, A. M. Crugnola, and E. Ellis ... 207
The effect of humoral components on the cellular response to textured and nontextured PTFE
N. J. Korman, O. Sudilovsky, and D. F. Gibbons 225

Issue 3, March 1984

Separation of macrophages from mouse peritoneal exudate cells with substrata coated with chemically modified collagens
S. Kasai, T. Akaike, T. Miyata, T. Kunimoto, and K. Nitta 243
Reduction in complement activation from biomaterials by removal of air nuclei from the surface roughness
C. A. Ward, A. Koheil, W. R. Johnson, and P. N. Madras 255
Water sorption in a bis(GMA)/TEGDMA resin
K-J. Söderholm 271
Healing pattern of small caliber dacron grafts in the baboon. An animal model for the study of vascular prostheses
E. M. Keough, A. D. Callow, R. J. Connolly, K. S. Weinberg, J. J. Aalberg, and T. F. O'Donnell, Jr. 281
In vivo metal-ion release from porous titanium-fiber material
P. Ducheyne, G. Willems, M. Martens, and J. Helsen 293

NOTES

In vivo biocompatibility studies. II. Biomer: Preliminary cell adhesion and surface characterization studies
R. E. Marchant, J. M. Anderson, K. Phua, and A. Hiltner 309

Streaming potential and streaming current measurements to estimate surface conduction and electric double layer structure of biomaterials
A. Voigt, R. Becker, and E. Donath 317

Issue 4, April 1984

Preface: The Percutaneous Devices Workshop, November 27 & 28, 1981
A. F. von Recum and C. W. Hall 321
Applications and failure modes of percutaneous devices: A review
A. F. von Recum 323
Surface properties determine bioadhesive outcomes: Methods and results
R. E. Baier, A. E. Meyer, J. R. Natiella, R. R. Natiella, and J. M. Carter 337
Design criteria for percutaneous devices
C. Grosse-Siestrup and K. Affeld 357
Some factors that influence prolonged interfacial continuity
C. W. Hall, P. A. Cox, S. R. McFarland, and J. J. Ghidoni 383
Some aspects of macrophage behavior at the implant interface
T. N. Salthouse 395
Infection of percutaneous devices: Prevention, monitoring, and treatment
K. A. Dasse 403

The mechanical strength of maxillary complete dentures
D. Vlissidis and S. A. Paipetis 413
Casting properties of Ni–Ti shape memory alloy
J. Takahashi, M. Okazaki, H. Kimura, and Y. Furuta 427
Mechanical properties of bone cement: A review
S. Saha and S. Pal 435

NOTES

Electron microprobe analysis of metal ion transport in cortical bone
J. Woodman, W. Shinn, R. Urban, J. Galante 463

Issue 5, May/June 1984

Free radical decay kinetics in PMMA bone cement
R. C. Turner 467
A canine *ex vivo* series shunt for evaluating thrombus deposition on polymer surfaces
M. D. Lelah, L. K. Lambrecht, and S. L. Cooper 475
Fatigue properties of carbon- and porous-coated Ti–6Al–4V alloy
S. D. Cook, F. S. Georgette, H. B. Skinner, and R. J. Haddad, Jr. 497

Release of corrosion products by F-75 cobalt base alloy in the rat. I: Acute serum elevations
A. Koegel and J. Black 513
The influence of temperature and specimen size on the flexural properties of PMMA bone cement
S. A. Brown and W. L. Bargar 523
Characterization of plasma polymerized silicone coatings useful as biomaterials
A. S. Chawla and R. Sipehia 537
In situ immunoradiometric assay of fibrinogen adsorbed to artificial surfaces
H. Y. K. Chuang 547
The peroxidase antiperoxidase staining of factor VIII-related antigen on cultured endothelial cells
S. Baughman, M. Herring, J. Glover, and R. Dilley 561
The quantitation of cultured cellular surface coverage: applications for transparent and opaque surfaces
M. Herring, D. Evans, S. Baughman, and J. Glover 567
Key references in biomaterials: Bone/biomaterial interface in orthopedic joint implants
T. A. Gruen and A. Sarmiento 577

Issue 6, July/August 1984

The healing of hamster skin ulcers treated with *n*-butyl-2-cyanoacrylate (Histoacryl blue)
K. A. Galil, G. Z. Wright, and I. D. Schofield 601
Detection of cyanoacrylate tissue adhesives in histological sections
K. A. Galil, I. D. Schofield, and G. Z. Wright 609
Extracorporeal removal of mercury by hemoperfusion through agarose–polymercaptal microsphere beads
S. Margel, L. Marcus, A. Mashiah, H. Savin, and M. Dalit 617
The formation of stain on acrylic surfaces by the interaction of cationic antiseptic mouthwashes and tea
M. Addy and J. Moran 631
Convex-lens-on-slide: A simple system for the study of human plasma and blood in narrow spaces
A. L. Adams, G. C. Fischer, P. C. Munoz, and L. Vroman 643
Modification of polyetherurethane for biomedical application by radiation induced grafting. II. Water sorption, surface properties, and protein adsorption of grafted films
B. Jansen and G. Ellinghorst 655
The interaction of urea with the generic class of poly(2-hydroxyethyl methacrylate) hydrogels
L. Pinchuk, E. C. Eckstein, and M. R. Van De Mark 671

Equilibrium absorption of human serum albumin and human fibrinogen on hydrophobic and hydrophilic surfaces
E. Brynda, N. A. Cepalova, and M. Štol 685
Adsorption and reactivity of human prothrombin to artificial surfaces
H. Y. K. Chuang and S. P. Mitra 695
Correlation between microstructure of Ag-Pd-Au-Cu alloy and changes in shape on aging
K. Asaoka, K. Tsuji, and N. Kuwayama 707
Announcement 717

Issue 7, September 1984

Direct electron microscopy studies of the bone–hydroxylapatite interface
B. M. Tracy and R. H. Doremus 719
Toxic reactions evoked by glutaraldehyde-fixed pericardium and cardiac valve tissue bioprosthesis
E. Gendler, S. Gendler, and M. E. Nimni 727
Intraocular-lens-endothelial interface: Adhesive force measurements
S. Reich, M. Levy, A. Meshorer, M. Blumenthal, M. Yalon, J. W. Sheets, and P. Goldberg 737
Significance of the inner-surface structure of small caliber prosthetic blood vessels in relation to the development, presence, and a fate of a neo-intima. A morphological evaluation
F. Hess, C. Jerusalem, P. Grande, and B. Braun 745
Development of topical BAPN delivery system for acute spinal cord injury in dogs
M. Chvapil, P. R. Weinstein, R. L. Misiorowski, D. Telles, L. Rankin, and V. Stoy 757
The influence of dentine on the *in vitro* cytotoxicity testing of dental restorative materials
S. D. Meryon 771
Influence of the suture diameter on the tensile strength of polypropylene monofilaments and its relationship to the USP specification
R. P. Kusy and J. Q. Whitley 781
Bond strength and hardness of light-activated composite resins
T. M. Schulein, D. B. Boyer, and Y. Chalkley 789
Inhibition of thrombus formation on intravascular sensors by electrical polarization
J. M. Schmitt, M. Baer, J. D. Meindl, M. F. Anderson, and F. G. Mihm 797
Marginal leakage of class V cavity preparations
T. C. Dumsha and G. Biron 809
Correlation of tissue reaction to corrosion in osteosynthetic devices
H. G. French, S. D. Cook, R. J. Haddad, Jr. 817

An *in vivo* method for the biological evaluation of metal implants
J. C. Keller, G. W. Marshall, and E. J. Kaminski 829
Difference of bond bonding behavior among surface active glasses and sintered apatite
T. Fujiu and M. Ogino 845

Issue 8, October 1984

Academic focus: Graduate study in dental materials science at New York University College of Dentistry
T. K. Vaidyanathan and A. Schulman 867
Demineralization and ion binding action of polycarboxylate cement liquid on human dental enamel
J. Vaidyanathan, T. K. Vaidyanathan, and A. Schulman 871
Molecular weight characterization of virgin and explanted polyester arterial prostheses
J. M. Maarek, R. Guidoin, M. Aubin, R. E. Prud'homme 881
Cytocompatibility of albuminated polyester fabrics
M. F. Sigot-Luizard, D. Domurado, M. Sigot, R. Guidoin, C. Gosselin, M. Marois, J. F. Girard, M. King, and B. Badour 895
Inhibition of surface induced coagulation by preadsorption of albumin-heparin conjugates
W. E. Hennink, S. W. Kim, and J. Feijen 911
The electrical stimulation of bone using a filamentous carbon cathode
M. Zimmerman, J. R. Parsons, H. Alexander, and A. B. Weiss 927
Effects of immersion in cholesterol-lipid solution on the tensile and fatigue properties of elastomeric polymers for blood pump applications
K. Hayashi, T. Matsuda, H. Takano, and M. Umezu 939
Covalent coupling of polysaccharides to silicon and silicon rubber surfaces
J. H. Elam, H. Nygren, and M. Stenberg 953
Determination of extractable methylene dianiline in thermoplastic polyurethanes by HPLC
A. L. Mazz·· and C. P. Smith 961

Issue 9, November/December 1984

The activation of the complement system by polymer materials and their blood compatibility
V. I. Sevast'ianov and E. A. Tseytlina 969
Removable partial denture design: A photoelastic study
B. L. Stewart and R. O. Edwards 979
Blood distribution of nickel, cobalt, and chromium following intramuscular injection into hamsters
K. Merritt, S. A. Brown, and N. A. Sharkey 991

The binding of metal salts and corrosion products to cells and proteins *in vitro*
K. Merritt, S. A. Brown, and N. A. Sharkey 1005
Materials, clinical and morphological evaluation of custom-made bioreactive-glass-coated canine hip prostheses
P. Ducheyne, M. Martens, and A. Burssens 1017
Assessment of tissue reactions to biomaterials: A model system using the foreign body response in the mouse lung to intravenously injected divinyl copolymer beads
C. I. Hood, F. J. Schoen, S. E. Coleman, and L. D. Mickley 1031
The fatigue strength of porous-coated Ti–6%Al–4%V implant alloy
S. Yue, R. M. Pilliar, and G. C. Weatherly 1043
Polyester prostheses as substitutes in the thoracic aorta of dogs. II. Evaluation of albuminated polyester grafts stored in ethanol
R. Guidoin, L. Martin, M. Marois, C. Gosselin, M. King, K. Gunasekera, D. Domurado, M. F. Sigot-Luizard, M. Sigot, and P. Blais 1059
Morphological characteristics of tendon cells cultured on synthetic fibers
J. L. Ricci, A. G. Gona, H. Alexander, and J. R. Parsons 1073
Improved photochemical bonding of composites to dentin using 4-methacryloxyethyl trimellitate anhydride
K. Nagata, T. F. Lundeen, and D. T. Turner 1089
A calorimetric study of the interaction of synthetic phospholipid liposomes with vinyl monomers, acrylates and methacrylates
S. Fujisawa, Y. Kadoma, and E. Masuhara 1105
The antithrombotic effect of prostaglandin E_1 immobilized on albuminated polymer matrix
T. Chandy, and C. P. Sharma 1115
In vivo validation of a cell culture test for biocompatibility testing of urinary catheters
D. T. Graham, G. E. Mark, A. R. Pomeroy, and E. B. Macarthur 1125
Property changes of UHMW polyethylene hip cup endoprostheses during implantation
P. Eyerer and Y. C. Ke 1137
Extracorporeal removal of specific antibodies by hemoperfusion through the immunosorbent agarose-polyacrolein microsphere beads: Removal of anti-bovine serum albumin in animals
L. Marcus, A. Mashiah, M. Offarim, and S. Margel 1153
In vivo biocompatibility studies. V. *In vivo* leukocyte interactions with Biomer
R. E. Marchant, K. M. Miller, and J. M. Anderson 1169
